## Oil & Gas Advisory Services

Operations Management • HSE • Workforce Development

French Guiana • Guyana • Suriname • Caribbean Region

<b>20+ years</b> Industrial & O&G experience	<b>\$743M</b> Local content spending Guyana 2024	<b>1M bpd</b> Guyana's oil output target 2026
-------------------------------------------------	-----------------------------------------------------	--------------------------------------------------

## WHY THIS MATTERS NOW

Guyana's Local Content Act (2021, updated 2026) mandates priority contracting to qualified regional firms. Companies operating in the Stabroek Block — ExxonMobil, Hess, CNOOC — must demonstrate local and regional workforce development as part of compliance reporting.

The ILO has documented a critical skills gap in HSE officers, operations supervisors and maintenance managers. This gap is costing operators efficiency and regulatory compliance.

### Key market signals:

- › Faster local content certification from Jan 2026
- › 90% local targets in services & logistics
- › Guyanese HSE officers & managers rising through ranks but needing structured development
- › Suriname & French Guiana entering regional supply chain

## OUR ADVISORY SERVICES

Operations Management	HSE Management	Workforce Development
› Maintenance planning & scheduling › Pipeline operations management › Shutdown & turnaround coordination › Asset integrity advisory	› HSE compliance audits & gap analysis › Safety management system implementation › Environmental impact assessment › Hazardous waste management	› Operations supervisor training › HSE officer upskilling programs › Local content workforce planning › Performance management systems

# FIELD EXPERIENCE — A PROVEN TRACK RECORD

Period	Organisation	Key Contributions
2004–2010	Véolia Environnement — France	Industrial & petroleum maintenance engineering. Pipeline pigging. Hazardous waste management. Site audits & inspections. 6 years front-line industrial operations.
2011–2012	Gulfstream Project — France / Guinea / Côte d'Ivoire	Landfill gas (methane) treatment plant installation. Project management across West Africa.
2013–2014	Groupe Harena B — Madagascar	HSE Project Manager: construction & operation of two hazardous waste treatment centres.
2015	Galana Raffinerie Terminal — Madagascar / Mozambique	Petroleum maintenance technical solutions. Pipeline pigging. Hydrocarbon separator compliance & conformity. Environmental coordination.
2016–2020	GS Eau Project / UN UNFCCC — Madagascar	Senior project manager supporting environmental project developers. Institutional structuring.
2020–Now	Satorry-MIH — French Guiana, Antilles	Operations advisory & workforce development. 1,500+ hours of professional training delivered. Qualiopi certified.

*"The Caribbean energy transition demands advisors who have been on the ground — not just in the boardroom. Satorry-MIH brings field-tested expertise directly to your operations, fully aligned with Guyana's Local Content Act."*

## WHY SATORRY-MIH

<b>Regional anchor</b>	Based in French Guiana — 15 min from Suriname border. We know the terrain, the cultures, the constraints.
<b>Field-tested</b>	Not a desk advisory firm. Real maintenance, HSE and operations experience across Africa, Indian Ocean and the Caribbean.
<b>Local content ready</b>	Fully aligned with the Guyana Local Content Act 2021 and 2026 updates. We help you comply and compete.
<b>Bilingual</b>	French / English operations. Bridging the French Guiana–Guyana corridor that most advisors miss.
<b>Quality certified</b>	Qualiopi certified (AFNOR 2025-2028) — European quality standard for training & advisory delivery.
